REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Independent claims 8 and 23 call for a catheter having a predefined bend between the proximal and distal ends. The closest reference Lundquist (US 5306245) discloses a catheter that must be manually bent by the user. Claim 53 calls for the operative element to be longitudinally aligned with the steering spring. Lundquist teaches the location of the operative elements to be distal to the steering spring. Claims 10, 15, 17, 24, and 27 have been rejoined with the application since independent claims 8 and 24 are generic to those claims and allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
